

UBH-100

The UBH-100 is a high-quality USB Skype phone that enables you to enjoy the full benefit of Skype. Simply by plugging it into the USB port of your PC or laptop, you can make/answer Skype calls, with excellent sound quality and high security with end-to-end encryption.

Advanced echo cancellation DSP that enable the large speaker to provide loud and clear sounds. The sounds from loud speaker which may feed back to the microphone are cancelled by the DSP so that the calling party wouldn't hear his own voice (or we call it echo). Friendly user interface provides dedicated buttons for answering call and muting microphone. The smart design plays a role as your perfect Skype accessory for both office and home use.
